## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Vis-a-vis independent claim 31, McMahon is considered the best reference. The electro-optic switching device of McMahon comprises generally a combination of birefringent crystal elements and polarization rotators forming a plurality of units each comprising a birefringent crystal element and a polarization rotator. However, the arrangement of the crystal elements and the rotators is in a reverse order of that of the present invention which is a variable optical delay device. Further, McMahon's device does not have any unit control element that is to be associated with each unit. Therefore, in view of the foregoing, it is noted that the optical performances of the two devices in question are clearly different. Sure enough, one device works as a switch, the other, as a variable delay device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Loha Ben at telephone number (703)308-4820.

The examiner's work schedule is from Monday to Saturday, and generally between 12:00 noon and 8:00 p.m.

A receptionist can be reached at (703)308-0956 concerning matter of a general nature.
